1. Objective

The process validates whether a Vendor ID extracted from a **WI3 PDF** exists in the system’s vendor records. Based on the result, the system either updates the work item with a success message (if the vendor is found and added) or rejects it with a rejection note (if the vendor is not found). The primary goal is to ensure that vendor records remain accurate and up to date, preventing data inconsistencies that may lead to:

- Conflicting or duplicate vendor information in the system
- Delays in invoice processing and payments
- Increased risk of compliance violations or audit issues
- Financial discrepancies and reporting errors
- Strained relationships with vendors due to mismanaged records

1.1. Business Objectives and Benefits

Objectives	Expected Benefits
Ensure vendor IDs extracted from WI3 PDFs are validated against system records	Improved data accuracy and integrity
Update or reject work items based on vendor availability	Faster and more reliable work item processing
Maintain consistency of vendor records across the system	Reduced risk of duplicate or conflicting vendor data
Prevent business disruptions caused by outdated or missing vendor information	Minimized financial discrepancies and compliance issues
Standardize the handling of WI3 vendor validation through automation	Time savings, reduced manual effort, and improved efficiency

2. Current Process

2.1. Process Overview

Currently, WI3 work items in the ACME System are handled manually by the operations team. The process requires staff to download invoices, extract key vendor details, and manually validate whether the vendor exists in the system. This manual approach is time-consuming, prone to human error, and increases the risk of data inconsistencies when vendor information is missing, outdated, or duplicated.

2.1.1 High Level Process Diagram

2.1.2 Detailed Process Map

2.2. Standard of Metrics

General information about the process selected for RPA, prior to automation:

Process name	W13 Vendor Validation and Update
Function	Vendor Management / Data Validation
Department	Operations / Finance
Process short description	Manual validation and update of Vendor ID from W13 work items in ACME System
Process schedule	Daily, during business hours (8AM: 4PM with a one flexible hour)
#of items process/month	~10,040 (approx. 600 per business day)
Average cycle time	10–15 minutes per work item
Average handling time	8–10 minutes per work item
Peak period(s)	Month-end, Quarter-end, and Year-end financial closing periods
# of FTE supporting this activity	3 full-time employees
Input Data	W13 work items, associated invoice PDFs containing vendor details (Invoice ID, Date, Vendor, Tax ID, City, Country)
Output Data	Updated W13 work item status with comments ("vendor id updated to system" or "vendor id rejected [not found on system]"); vendor data records updated in ACME System
Return on investment	High — automation reduces manual effort, improves data accuracy, accelerates processing speed, ensures consistency, and mitigates financial/reputational risks

Detailed Process Steps

step	Description	Guide Images	Expected	Errors
1.1	Open the ACME System 1 Web Application		Opening of a screen : System Web App	Possible exception: - Handle exception if <i>Web app not available</i>
1.2	Log in to System (input data: email and password)		Access to the dashboard	Possible exception: - Handle exception if <i>Incorrect email or Password</i>
1.3	Access the Dashboard, Select Work Items		Show the work items at the top	

1.4	Access the Work Items Then WI3	Work Items Home / Work Items Search Results Please find below your work items. They need to be completed in the order specified by your manager. <table><tr><th>Actions</th><th>WIID</th><th>Description</th><th>Type</th><th>Status</th><th>Date</th></tr><tr><td> </td><td>107312293</td><td>Verify Account Position</td><td>WI1</td><td>Completed</td><td>2023-04-22</td></tr><tr><td> </td><td>107312235</td><td>Process Vendor Invoice</td><td>WI3</td><td>Open</td><td>2017-02-03</td></tr><tr><td> </td><td>107312237</td><td>Research Client Check Copy</td><td>WI2</td><td>Open</td><td>2025-03-16</td></tr><tr><td> </td><td>107312236</td><td>Research Client Check Copy</td><td>WI2</td><td>Open</td><td>2023-08-03</td></tr><tr><td> </td><td>107312273</td><td>Verify Account Position</td><td>WI1</td><td>Open</td><td>2020-05-29</td></tr></table>	Actions	WIID	Description	Type	Status	Date	 	107312293	Verify Account Position	WI1	Completed	2023-04-22	 	107312235	Process Vendor Invoice	WI3	Open	2017-02-03	 	107312237	Research Client Check Copy	WI2	Open	2025-03-16	 	107312236	Research Client Check Copy	WI2	Open	2023-08-03	 	107312273	Verify Account Position	WI1	Open	2020-05-29	List of all work items	Possible exception: under work items, the work items are not listed. [to solve, hover over User Options, reset test data, click the blue button Reset Test Data]
Actions	WIID	Description	Type	Status	Date																																			
 	107312293	Verify Account Position	WI1	Completed	2023-04-22																																			
 	107312235	Process Vendor Invoice	WI3	Open	2017-02-03																																			
 	107312237	Research Client Check Copy	WI2	Open	2025-03-16																																			
 	107312236	Research Client Check Copy	WI2	Open	2023-08-03																																			
 	107312273	Verify Account Position	WI1	Open	2020-05-29																																			
1.5	For each activity of the type WI3 perform the following steps																																							
1.6	Open the Details page for the selected activity from the magnifying glass sign		Show the information inside the invoice																																					

1.7	Click the Blue button Download PDF Invoice	Work Items - Work Item Details Home / Work Items / Work Item Details Process Vendor Invoice Invoice Information Invoice ID: 959817 DateDate: 2017-12-22 Amount: 151457 Currency: EUR Download PDF Invoice Work Item Details WIID: 107312235 Type: Process Vendor Invoice Status: Open Date: 2017-02-03 Update Work Item Copyright © 2025 ACME Systems	You should see the [Download PDF Invoice] at the left bottom with a blue color	
1.8	Extract the following information: Invoice ID Date Vendor Tax ID City Country	INVOICE Invoice ID: 959817 Date: 2017-12-22 Vendor: Technology Lake Address: Hauptbahnhof Strasse 21 Tax ID: DE763212 City: Stuttgart, Country: Germany TO ACME Systems Inc. R0012326 Somewhere Road, 59 Building A Bucharest Romania		
1.9	Return to home page. Hover over Vendors and select Search for Vendor	Welcome, desham8@gmail.com to System 1. If this is your first time logging in, please make sure to go to User Options -> Reset Test Data User options Work Items Accounts Checks Vendors Invoices Internal Invoices Reports Students Search for Vendor Add Vendor Download Resource Report Resource Order Download Vendor List Vendor Inventory Upload Order Vendors Stock Create Order	Search for Vendor is the first option in the list that should pop up when hover over Vendors icon	

1.10 IF_COND	In the Vendor TaxID input box, enter the extracted tax id for the vendor and hit Search button	Vendors Home / Vendors You may search based on the Vendor's TaxID OR based on the Vendor name. Vendor TaxID: DE763212 - OR - Vendor Name: Search Display All Vendors
---------------------	--	---

1.14 IF_YES	Go back to the home page, choose work items, then choose WI3 and then click the button at the bottom right with the pencil logo and it's called Update Work Item	Work Items - Work Item Details Home / Work Items / Work Item Details Process Vendor Invoice Invoice Information Invoice ID: 959817 DateDate: 2017-12-22 Amount: 151457 Currency: EUR Download PDF Invoice Work Item Details WIID: 107312235 Type: Process Vendor Invoice Status: Open Date: 2017-02-03 Update Work Item	The Wrok tiem data, with the button Download PDF Invoice that used before for extracting the data and the button Update Work Item shown at the bottom right.	
1.15	Enter the comment in its place under Add comments	ACME System 1 - Google Chrome acme-test.uipath.com/work-items/update/107312235 Update Work Item Update Work Item WIID: 107312235 Type: Process Vendor Invoice Status: Open Date: 2017-02-03 Comments: Add Comments: New Status: Update Work Item Copyright © 2025 ACME Systems	You'll see the place to add comment, insert [Vendor ID Updated to system]	
1.16 IF_YES	And then set the status to [complete] from the drop down menu and hit the button with pencil logo [Update Work Item]	ACME System 1 - Google Chrome acme-test.uipath.com/work-items/update/107312235 Update Work Item Update Work Item WIID: 107312235 Type: Process Vendor Invoice Status: Open Date: 2017-02-03 Comments: Add Comments: New Status: Update Work Item Copyright © 2025 ACME Systems		

1.17 IF_YES	You'll see the pop up that tells you that the Work Item has updated, click ok.		Pop up at the top with [ok] button at the bottom right of it.	
1.18 IF_NO	If vendor id not found, go to the WI3, and click on Update Work Item button at the bottom right			
1.19 IF_NO	You'll see the place to add comment, insert [Vendor ID Rejected – not found] And then set the status to [rejected] from the drop down menu and hit the button with pencil logo [Update Work Item]		See the [Add Comments] section, and below to it there's an entry box for writing the comment	

1.20 IF_NO	You'll see the pop up that tells you that the Work Item has updated, click ok.		Pop up will appear with an [ok] button at the bottom right of it.	
---------------	--	---	---	--

2.3. Volume of data

Activity	Time taken per month (hours)	Volume of data to be processed
Scraping WI3 cases from ACME	100	~12,000 WI3 cases
Downloading and extracting vendor data from PDFs	350	~12,000 invoice PDFs
Manual validation of vendor records in ACME	420	~12,000 vendor entries
Updating WI3 work items with status/comments	280	~10,800 valid cases (≈90%)
Reporting anomalies (vendors not found) via comments	90	~1,200 anomaly cases (≈10%)
Quality check / review	140	~1,200 records (≈10%)
Total	1,380	~12,000 WI3 cases

The activity volumes and time estimates are calculated based on an average monthly workload of approximately 12,000 WI3 cases. Each case requires scraping and vendor data extraction from PDF invoices, followed by validation against system records. Based on historical patterns, around 90% of the cases proceed to vendor updates in the ACME system, while roughly 10% result in anomaly reporting due to missing or unregistered vendors. Additionally, about 10% of the total cases undergo quality review to ensure accuracy and compliance. These figures are indicative and should be cross-validated with actual process logs prior to automation to confirm accuracy.

3. Business Rules

The following business rules are those that must be adhered to as the process runs.

BR#	Requirement	Additional Information
BR1	Each WI3 case must have a valid Tax ID extracted from the PDF before processing.	If the Tax ID is missing, incomplete, or unreadable, the case must be flagged as an exception and marked with the comment: <i>"Incomplete vendor data in PDF."</i>
BR2	Vendor validation must always be performed using the Tax ID .	Searching by name, city, or other attributes is not permitted to avoid mismatches or duplicates.
BR3	If the vendor exists in the system, it must be added/updated using the extracted details.	After updating, the WI3 case must be marked as completed with the comment: <i>"vendor id updated to system."</i>
BR4	If the vendor does not exist in the system, the WI3 case must be rejected.	The work item must be updated with the comment: <i>"vendor id rejected [not found on system]."</i>
BR5	All system updates must generate an audit log.	The log must include WI3 case ID, action taken, timestamp, and user/bot ID to ensure traceability and compliance.

4. Detailed Process Steps – AS IS

Currently, the WI3 Vendor Validation process is performed manually by three full-time employees (FTEs). Each case requires downloading the WI3 invoice PDF, extracting vendor details, and checking for the vendor's existence in the ACME System. The manual approach is slow, repetitive, and prone to human error. It often leads to inconsistent handling, delayed processing, and potential confusion among staff, especially during peak periods.

5. To-be Pre-process steps (Proposed solution)

The process should no longer rely on employees for manual searching. Instead, the bot will automatically detect the **Vendor** using the **Tax ID** from WI3 invoices and update the corresponding work item with the appropriate status, depending on whether the vendor is found in the system or not.

6. In Scope

The table below shows the high-level steps that are in scope for the automation.

Process step	Comments
Extraction of PDF information from WI3 work items	Log in to the ACME System, navigate to the WI3 queue, download the associated PDFs, and extract the required vendor data (Invoice ID, Date, Vendor, Tax ID, City, Country).
Validation of Vendor (Tax ID)	Check the existence of the extracted Tax ID in the ACME vendor records to confirm whether the vendor already exists in the system.
Updating the Vendors	If the vendor is found, update or add vendor details in the system to ensure accuracy and consistency of records.
Updating WI3 work items	Update the WI3 work item with the appropriate status: - "vendor id updated to system" if the vendor is found. - "vendor id rejected [not found on system]" if the vendor is not found.

7. Non-process requirements

8.1. Systems

System	Usage	Frequency
ACME System	Primary application for retrieving WI3 cases, downloading invoice PDFs, extracting vendor data, validating Tax IDs, and updating work item records.	Daily (multiple times per day, depending on workload)
PDF Reader files	Used to open and parse invoice PDFs in order to extract the required vendor data fields (Invoice ID, Date, Vendor, Tax ID, City, Country).	Daily (core part of the process)
Excel / CSV Files	Used for storing extracted case data and logs of processed transactions for audit/reporting.	Daily (per batch run)

8.2. Reporting

Report name	Source	Purpose
Daily Processing Log Report	Automation logs (Excel/CSV generated by the bot)	To track the number of WI1 cases processed, monitor the daily success rate, and identify exceptions raised.
Exception Report	Automation exception handling (captured from ACME system + bot logs)	To list cases that failed validation or could not be processed automatically, highlighting items that require manual intervention.
Monthly Performance Report	Consolidated data from automation logs and ACME records	To provide insights on total items processed, average handling time, time saved, and ROI metrics.

9. Appendix

Open Questions

Date written	Date of response	Question / comment	Response from reviewer
28-Aug-2025	30-Aug-2025	Please confirm if reporting (daily/weekly) should be generated automatically.	Yes, after this process it will be automated for both weekly and daily reports.
31-Aug-2025	–	–	–

Escalations

For immediate contacts for the process automation project, kindly contact the respective contact on the table below:

Email Address	Roles	Responsibilities
Mo.Mesbah@company.com	Project Manager	If any blockers come up which stop the progress of the work
Harpreetsethi@company.com	Project Sponsor & Director of HR	For queries on budget & resource requirements / challenges
kathywhite@company.com	Business Analyst	Further clarification on process, business rules & scope of activities
